Details the Basic Rules of the Game:

- This is a Two-Player Game
- Objective is to earn as much money as possible
- The game ends when one player goes bankrupt or a player decides to the end the game.
- Press “enter” to start the game

Roll the Dice

You rolled 3, 3

The computer will automatically roll for the player once it's their turn and move the player to the correct spot.

Player on a New Block

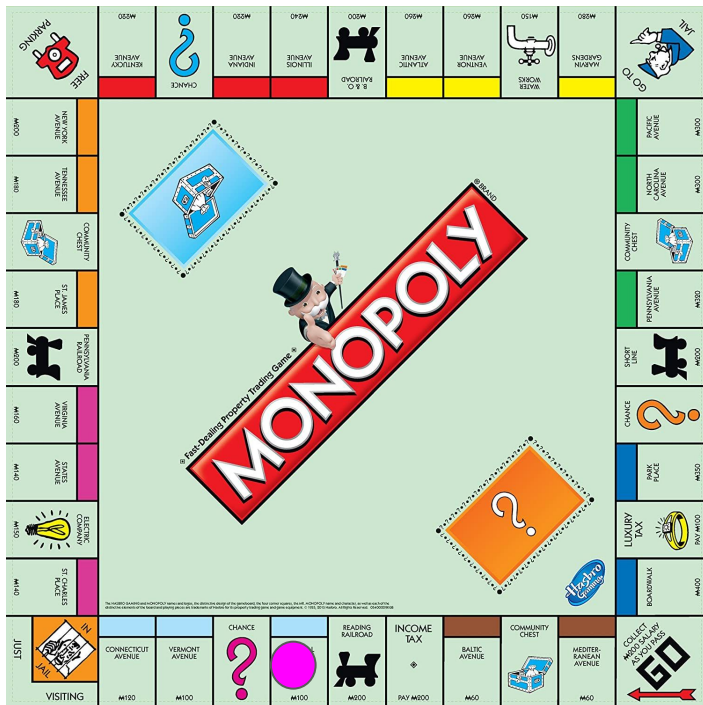

You landed on Oriental Avenue.
Would you like to buy the property
for \$100?

If yes, remove \$100 from player's bank account.

Note: rent will increase based on if there are houses/hotels on the block.

Paying Rent

You landed on Oriental Avenue. You owe player 1 \$10 for rent.

It will automatically take out the \$10 from player 2's bank account and add it to player 1's. If player 2 doesn't have enough money, they lose the game.

Buying a House

You landed on Oriental Avenue, would you like to buy a house for \$20?

This message will only be displayed if the player can afford to buy a house. If they say yes then a rectangle of the same color as the player will be put on the block.

Landing on a Special Block

You landed on chance. You won the won \$100 in the lottery.

This would increase the player's bank account by \$100 and it would be the other player's turn.

The community chest cards work similarly. For the other special blocks such as landing on go, free parking, and going to jail, they will follow their own rules and display what is happening to the player.

End of Game

Scenario 1:

“Player 1 went bankrupt, Player 2 wins!”

Press r to restart the game

Scenario 2:

“Player 2 decided to end the game. Player 2 was in the lead with \$500!”

(this would be done with a key press)

Press r to restart the game
